

Cricket Player Performance Tracking Application

(CRICKSTATS) - Project Report

Domain: Salesforce Lightning Administration & Automation

Platform: Salesforce Developer Edition (Lightning Experience)

Team Members: S. Sarathsekar (Lead), S. Sarathi, V. Sathish, A. Santhosh, S. Santhosh

1. Executive Summary

The CRICKSTATS application is a purpose-built custom solution implemented on the Salesforce Lightning platform. It centralizes player roster management, captures granular per-match metrics (runs scored, wickets taken, overs bowled, catches), automatically computes career aggregates through Master-Detail roll-up summaries, and provides an intuitive team-filtering Screen Flow interface directly on the Lightning Home page.

2. System Architecture & Data Model

Object Name	API Name	Relationship Type	Description
Player	Player__c	Parent Object	Stores athlete biographical details, team affiliation, playing role, and automated career totals.
Match Performance	Match_Performance__c	Child Object (Master-Detail)	Records match-by-match performance stats linked directly to a master player record.

3. Activity Breakdown & Implementation Log

Module 1: Developer Environment Setup

- Activity 1 & 2: Developer Org Creation and Configuration
Provisioned and verified an active Salesforce Developer Edition org, configured administrative profile permissions, and verified domain readiness.

Module 2: Custom Objects Creation

- Activity 1: Player Custom Object (**Player__c**)
Created the custom object with standard record name and data tracking enabled.

The screenshot shows the Salesforce Setup interface for the 'Player' custom object. The top navigation bar includes the 'Developer Edition' label, a search bar, and various utility icons. The main navigation menu on the left lists various setup areas, with 'Object Manager' selected. The 'Player' object is highlighted in the breadcrumb trail. The 'Details' tab is active, showing a list of configuration options on the left and their current values on the right. The 'API Name' is 'Player__c', and the 'Custom' checkbox is checked. The 'Singular Label' is 'Player' and the 'Plural Label' is 'Players'. The 'Enable Reports' checkbox is checked, and the 'Track Activities' checkbox is also checked. The 'Deployment Status' is 'Deployed'. The 'Help Settings' link points to the 'Standard salesforce.com Help Window'.

Configuration Option	Value
Description	Stores cricket player details and overall statistics.
API Name	Player__c
Custom	✓
Singular Label	Player
Plural Label	Players
Enable Reports	✓
Track Activities	✓
Track Field History	
Deployment Status	Deployed
Help Settings	Standard salesforce.com Help Window

- **Activity 2: Match Performance Custom Object (Match_Performance__c)**
Created the transactional match recording object designed for multi-entry statistics.

The screenshot shows the Salesforce Setup interface for the Match_Performance__c custom object. The top navigation bar includes the 'Developer Edition' label, a search bar, and various utility icons. The left sidebar contains a list of setup categories, with 'Object Manager' selected. The main content area displays the 'Match Performance' details, including a description, API Name (Match_Performance__c), and various configuration options like 'Enable Reports', 'Track Activities', and 'Track Field History'. The 'Details' tab is active, and the 'Match Performances' plural label is visible.

Module 3: Custom Tabs & App Configuration

- Activity 1: Lightning Custom Tabs
Generated tab identifiers and icons for both custom objects to enable direct user access.

The screenshot displays the Salesforce Setup interface for a Developer Edition user. The left sidebar contains navigation links for Setup Home, Salesforce Go, Service Cloud Reports, Commerce Setup Assistant, Hyperforce Assistant, Release Updates, Salesforce Mobile App, Lightning Usage, AgentExchange Offers, Sales Cloud Everywhere, ADMINISTRATION (Users, Data, Email), and PLATFORM TOOLS (Subscription Management, Apps, Feature Settings, Slack, Data Cloud, Heroku, MuleSoft, Einstein). The main content area is titled 'SETUP Tabs' and includes a search bar. Below the title, there is a 'Custom Tabs' section with a description: 'You can create new custom tabs to extend Salesforce functionality or to build new application functionality. Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.'

The 'Custom Tabs' section is divided into four sub-sections:

- Custom Object Tabs:** Contains two tabs: 'Match Performances' (Moon icon) and 'Players' (Stopwatch icon).
- Web Tabs:** No Web Tabs have been defined.
- Visualforce Tabs:** No Visualforce Tabs have been defined.
- Lightning Component Tabs:** Contains five tabs: 'Get Started with Agentforce' (Heart icon), 'Get Started with Data Cloud' (Map icon), 'Get Started with MuleSoft' (Heart icon), 'Get Started with Salesforce DX' (Building Block icon), and 'Welcome' (Gears icon).

Each tab entry includes an 'Action' column with 'Edit' and 'Del' links, a 'Label' column, a 'Tab Style' column, and a 'Description' column.

- **Activity 2: CRICKSTATS Lightning App**

Built the standalone Lightning App containing dedicated navigation items: HomePlayers, and Match Performances.,

Module 4: Custom Fields & Relationship

- Activity 1: Player Profile Attributes
Defined core attributes including Age (Number), Role (Picklist: Batsman, Bowler, All-Rounder, Wicket Keeper), and Team (Picklist: CSK, MI, RCB, KKR, SRH, DC, RR, GT, LSG, PBKS)

The screenshot shows the Salesforce Setup interface for the 'Player' object. The 'Fields & Relationships' tab is selected, displaying a list of 18 fields. The left sidebar contains navigation options for the object, and the top navigation bar shows the current path: SETUP > OBJECT MANAGER > Player.

Fields & Relationships
18 Items, Sorted by Field Label

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Age	Age__c	Number(2, 0)		
Country	Country__c	Text(50)		
Created By	CreatedById	Lookup(User)		
Last Modified By	LastModifiedById	Lookup(User)		
Number of 100's	Number_of_100_s__c	Roll-Up Summary (COUNT Match Performance)		
Number of 50's	Number_of_50_s__c	Roll-Up Summary (COUNT Match Performance)		
Owner	OwnerId	Lookup(User, Group)		✓
Player Name	Name	Text(80)		✓
Role	Role__c	Picklist		
Team	Team__c	Picklist		
Total 4's	Total_4_s__c	Roll-Up Summary (SUM Match Performance)		
Total 6's	Total_6_s__c	Roll-Up Summary (SUM Match Performance)		
Total Catches	Catches__c	Roll-Up Summary (SUM Match Performance)		

- **Activity 2: Match Performance Fields & Master-Detail Link**
Implemented the Master-Detail relationship linking each match record to its respective Player. Defined statistics fields: Runs Scored, Balls Faced, Wickets Taken, Overs Bowled, and Catches.

Module 5: Automated Calculations (Roll-Up Summaries)

- Activity 1: Aggregated Career Metrics

Created automatic roll-up summaries on the Player parent object:

- Total Runs: SUM of Runs Scored from child Match Performance records.
- Total Wickets: SUM of Wickets Taken from child Match Performance records.
- Matches Played: COUNT of child Match Performance records.

The screenshot shows the Salesforce Setup interface, specifically the 'Object Manager' for the 'Player' object. The 'Fields & Relationships' tab is selected, displaying a list of 18 fields. The left sidebar contains a navigation menu with options like Details, Fields & Relationships, Page Layouts, etc. The main content area shows a table of fields with columns for the field name, API name, and data type. The 'Fields & Relationships' section is titled '18 Items, Sorted by Field Label' and includes buttons for 'Quick Find', 'New', 'Deleted Fields', 'Field Dependencies', and 'Set History Tracking'.

Field Name	API Name	Data Type
Number of 50's	Number_of_50_s__c	Roll-Up Summary (COUNT Match Performance)
Owner	OwnerId	Lookup(User,Group)
Player Name	Name	Text(80)
Role	Role__c	Picklist
Team	Team__c	Picklist
Total 4's	Total_4_s__c	Roll-Up Summary (SUM Match Performance)
Total 6's	Total_6_s__c	Roll-Up Summary (SUM Match Performance)
Total Catches	Catches__c	Roll-Up Summary (SUM Match Performance)
Total Matches	Total_Matches__c	Roll-Up Summary (COUNT Match Performance)
Total Overs	Total_Overs__c	Roll-Up Summary (SUM Match Performance)
Total Runs	Total_Runs__c	Roll-Up Summary (SUM Match Performance)
Total Stumpings	Stumpings__c	Roll-Up Summary (SUM Match Performance)
Total Wickets	Total_Wickets__c	Roll-Up Summary (SUM Match Performance)

Module 6: Automation & Screen Flow Deployment

- Activity 1: Player Flow Builder Canvas
Constructed an interactive Screen Flow with a Team Selection picklist, dynamic record retrieval (Get Records), and a rich Data Table displaying matching player details

- **Activity 2: Deployment on CRICKSTATS Home Page**
Embedded the Player Flow onto the custom Lightning Home Page and set application default activation for CRICKSTATS users.

4. Conclusion & Verification

All 11 modules and activities were verified and marked as reviewed on the [SkillWallet Project Review](#), confirming complete data integrity, relational roll-up calculations, and seamless interactive Flow execution on the Salesforce Lightning platform.
